With Coach Darcy Eikenberg

If your leadership team needs connection, clarity, & coaching,
our leadership roundtables will help.

WHY LEADERSHIP ROUNDTABLES

More than just an offsite, our Leadership Roundtable model provides you with a structured session (or series of sessions) professionally designed and facilitated to:

- Stimulate safe yet powerful conversations on critical topics—the ones that never get enough airtime during the workweek
- Increase clarity and cross-functional understanding of key business goals, accelerating alignment and reducing future mistakes
- Build active collaboration skills and increase innovative thinking
- Speed up decision-making skills as a team, so you know what to say yes to—and what to say no to
- Eliminate blind spots or thought bubbles
- Helps the CEO (or leaders' leader) connect more deeply and create more personal and professional certainty around decisions and actions

HOW WE MAKE THEM WORK FOR YOU

Our team partners with you to craft a program that's highly relevant to your top issues and opportunities. There are no time-wasting, schoolyard "team-building" exercises here—our team knows how to make the most of your leaders' time while still creating an environment that's safe, fun, and productive.

- As needed, we develop and deploy relevant pre- and post-roundtable assessments, surveys, and measurement tools.
- With detailed preparation and day-of facilitation and coaching, each leader involved has the freedom to attend as a contributor (including the CEO or leaders' leader.) That equals lower stress with higher involvement and impact.
